Claim Rejections - 35 USC § 112

Claims 1 – 7 and 10 – 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1 and 16, the phrase “*the error* between measured clutch slip and a reference slip profile” suggests that between every ‘measured slip and a reference slip profile’ there is an error. Is that the case? Otherwise, there is a lack of antecedent basis.

Regarding claims 2, 10, and 16, a “normal driving portion” is vague and indefinite. What is considered ‘normal’ in this case?

Claims 3 – 7, 11 – 15, 17, and 18 are necessarily rejected.

Allowable Subject Matter

Claims 1, 2, 10, and 16 (along with their respective dependent claims) are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3661

Claims 8 and 9 are allowed. The prior art of record fail to teach a method of controlling engagement of a clutch which carries torque before, during and after a shifting event in a transmission which is connected to a throttle-controlled engine, the method comprising, among other limitations, determining an error between a measured clutch slip and a reference slip profile to provide a feedback input command; and summing a feed-forward input command and said feedback input command to determine a clutch control command for controlling engagement of the clutch before, during and after the shifting event to allow a desired amount of clutch slip to damp excitation of the transmission.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. As per attached PTO-892.
